

# DMCC/CCMC RECOMMENDED READING LISTS

## Part 1: Core reference Material (Revision November 2019)

### How to use this list

1. **Core references.** These contain material which is essential for understanding of the subject. They are given in the “Rapid Guide” table at the beginning of this list which indicates the modules to which they are relevant. This table is followed by the full details of the relevant references. Where a reference is listed as being useful for a section of the syllabus, it should be assumed that material relevant to most, if not all, of the sub-sections can be found in the reference.

NB. Some general interest material is also included in this list.

2. **Additional general references, some Codes of Practice and some items of general interest** are given following the Core Reference list.

### Part 2. Additional module-specific references.

This additional material, which is given in a separate file, is valuable additional reading material for the various sections of the syllabus. In this file:

- Under each section title are listed a few references that are valuable for that module.
- This list also contains any other references provided in lectures that are not included in the core references list
- Additional references are given for some of the sub-sections where there is a need to provide material relevant to a specialist subject. These enlarge on topics that are found in the general reference material for the section.

### Obtaining reference material

Many of the books listed are available at reduced cost from the following:

- Teaching Aids at Low Cost (TALC) <http://www.talcuk.org/>
- Tropical Health Technology <http://www.tht.ndirect.co.uk/list.htm>

Many of the publications are available on-line. For example:

- WHO publications can be accessed via the WHO website.
- A number of MSF publications are also available on line
- Overseas Development Institute’s Humanitarian Policy Group <https://www.odi.org/our-work/programmes/humanitarian-policy-group>
