

Note to Prospective Applicants for the Diploma in Genitourinary Medicine **AFTER 2021**

The Society of Apothecaries has in recent years provided the Diploma in Genitourinary Medicine exam twice annually.

From 2022 onwards the Society of Apothecaries will offer the Diploma in Genitourinary Medicine examination only once each year, in June.

The decision to reduce the exam to a single diet each year and to hold it in the summer has been made in close co-ordination with the Specialist Advisory Committee for Genitourinary Medicine. Our joint aim has been to ensure that the examination continues to meet the needs of trainees in Genitourinary Medicine to the highest possible standard.

Please note that the deadline for receipt of applications continues to fall 12 weeks before the date of the exam. The timetable of scheduled dates will be published online in our **Administrative Guidance for Candidates** to allow prospective candidates time to plan for this and other exams or commitments.
