

The Society very much looks forward to welcoming you to Apothecaries Hall.

As leaders in Health, we take our responsibilities to our Members', staff and guests' wellbeing very seriously. We encourage everyone to read the guidance below, before your visit, to help us to keep everyone safe and well. Thank-you.

Our requests of you

- Please take a look at and follow [government guidance](#) ahead of the event
- If you are feeling unwell or displaying Covid-19 symptoms, please do not attend the event.
- As the best way for us to protect our guests, members, and staff we expect that you and your guests will have been fully vaccinated against Covid19.
- If you are able, please perform a Lateral Flow Test (LFT) within 24 hours before your visit to Apothecaries Hall. Do not come if the result is positive.
- Should you wish to wear a face covering, you should feel comfortable doing so.
- Please arrive in good time and access the Hall via the entrance indicated. If you have visited previously, please note that we are now using the door to the left of the "old" door.
- In the interests of everybody's health & safety, we request that you observe the guidance of staff whilst on-site.

What you can expect from us:

- An enhanced cleaning programme, especially focusing on high touch surfaces and communal facilities remains in place.
- We encourage good hygiene through effective hand washing. Hand sanitiser is available throughout the Hall.
- If receiving lines are used, we regret that hand-shaking will not take place.
- Some guests will feel uncomfortable with hand-shaking, please do not feel offended should your offered hand be declined.
- As a Covid security measure, we will ensure that our rooms are well ventilated, this may mean some rooms feel cooler than you have been used to. You may wish to consider this when choosing your outfit for your visit.
- If you are attending a Society Dinner, please note that the Loving Cup and Rose Water Bowl ceremonies have been suspended.
- Our in-house caterers, Party Ingredients, have a rigorous risk assessment procedure and ensure that all catering services are provided using the highest standards of hygiene practice.
