

The Galen Medal of the Society of Apothecaries

The Galen Medal in Therapeutics is presented by the Society of Apothecaries annually and is its most prestigious award. It has been presented annually since 1925. The Medal is awarded for important services or contributions in the broad field of therapeutics. This can include treatments in clinical medicine or other clinically-related areas, therapeutic aspects of public health, and science leading to such treatments.

The silver gilt medal is based upon early nineteenth century medals which were designed by William Wyon, RA. A description of the medal is:

Obverse Bust of Galen looking to the left with the word "Galen" to the left of the effigy.

Reverse A seated woman representing Science instructing a youth seated by her in the properties of herbs – to the right a vase containing herbs and flowers, and to the left a pharmacist's oven, in the exergue the emblems of Asklepios, the Arms of the Society and the name W. Wyon, R.A.
